

DuraVision™ Convex Mirror Product Sheet:

Indoor Full Dome

The Ceiling Dome is probably the most effective surveillance method and deterrent to retail theft due to its large 360° area of reflection. In retail areas, when strategically placed, domes can be positioned above aisles and junctions for wide area surveillance and can even be used in some areas with ceiling hung banners.

This Full Dome mirror can assist surveillance of large areas in factories and warehouses where storage and high shelving obscure the vision of staff and forklift trucks at busy intersections.

Features

- 2mm or 3mm acrylic face
- Pure reflective coating
- Dome top screws for attaching to ceiling
- Suspension kit for hanging from high ceilings

Suitable Uses

- Retail and Security
- Office Cubicle Surveillance
- Four-way intersections in buildings
- Above high shelving and aisles
- Factory and warehouse crossroads
